

FREQUENTLY ASKED QUESTIONS:

1. What is the procedure for application?

- Carefully go through all the cases and select the one which you would be interested to work on and choose the same while filling out the registration form.
- Write your motivation for selecting the case study.
- You will soon receive a confirmation mail containing the submission details. Note that the confirmation will be based upon your motivation. So do fill it carefully.
- Submit the Case Study Analysis before the deadline specified. After reviewing, the finalists would be called for the final presentation during Aakaar.

1. What is a Case Study Analysis?

Case Study Analysis is a type of report which has multiple aspects, for example, the problems observed, possible solutions, their feasibility, etc. It should be a well-organized paper with all the essential components in place.

It requires you to critically analyze the given problem, brainstorm the solutions, and propose the most effective one using supporting evidence. Don't forget to mention the references. It should be sufficient enough for reviewers to discern the nature and significance of your solution, the fairness in your approach, and the nature of the results or progress to date.

Important Elements of a Case Study Analysis include-

- Problem(s) Identification
- Proposed Solution
- Logic supporting the solution and drawbacks (if any)

2. How can I analyze the problem of the case study?

- Critically read the case
- Define the central issue
- Identify the constraints to the problems
- Identify all the relevant alternatives
- Select the best alternative and brainstorm the solutions

3. Who all are eligible to participate?

All UGs and PGs (B.Techs, M.Techs, Dual Degree students, PhDs) students are eligible to participate.

4. Is a group allowed for registration of multiple Case Studies?

Yes, a group can register for more than one Case study. You'll have to register twice if you want to work on two case studies. There should not be more than three members in a group.
